 The shells of the above Hand Lamps are made of the very best refined steel, stamped up, which make them light, stiff, hard, and durable, wired round the base to prevent damaging, should they accidentally fall and strike on the edges. The great advantage of these lamps is that the handle is made in such a shape that it can be used as a hook to hang it by, and it makes it very useful and desirable for Plumbers, Boiler Makers, Machine Shops, or Miners.
